I wish to register my concern about the proposed building of some 200 plus new homes in Stretton on Dunsmore. Living as I do in the centre of the village I am concerned about flooding and traffic issues.

The last two years we have seen considerable flooding in the centre of the village with more houses adding to an already over loaded infrastructure and loss of natural drainage I see major problems ahead. Not to mention the continual eroding of green belt.

With 500 plus extra cars through the village and extra traffic on the narrow lanes I feel the least of our concerns will ruts and pot holes.

Our doctors surgery and the school will have to endure greater pressure . The addition of 200 plus new families would create considerable problems.

I suggest you look at other locations such as the derelict sites in Rugby.
